

LFT_Seaver

1 unsigned int (uint): Header length

Header

1 uint: Client operation code

==0: return file information

1 uint: server operation code

==0: find file and return information

1 unsigned long: file size

1 unsigned long: block size

1 unsigned long: total block number

VL: md5

==1: no file

==1: return file block

1 uint: server operation code

==0: find file and return block

1 unsigned long: block index

1 unsigned long: block length

==1: no file

==2: find file but block index error

==other: error code

1 uint: 400

Binary: only when find file and return block
